

THE WELDIN SITE

BLUE BALL PROPERTIES AREA TRANSPORTATION IMPROVEMENT PROJECT

We are conducting research to investigate the families that lived here. We are looking at tax records, wills, newspapers, local and county histories, and talking to the actual descendants of the people who worked the farm! It is also very important that the public be involved. We want to include as many people as possible in this exciting project. We need your help in telling us what your reactions are and what you know about history of the site and the community that surrounds it.

Project Sponsored by:

Delaware Department of Transportation 
Federal Highway Administration 

Archaeology Performed by:

McCormick, Taylor & Associates, Inc.
